A

Absorption, effect of O, N on Zr 1049
A Calorimetric Investigation of Heats of Formation and Precipitation in Some Cu-Sn Alloys 1257
Accommodation coefficient, solid, liquid 520
Acid bessemer process, introduction 460
Acid slags, alloying additions, effect on S transfer 534
Activation energy: creep of Al 919
Ta in O 1038
viscosity, Pb-Sn, Sb-Cd alloys 1060
A Correction to "The Sigma Phase in Binary Alloys" 758
Activities of Fe, FeO, Fe_2O_3, and CaO in Simple Slags 759
A Cursory Investigation of Intermediate Phases in the Systems Ti-Zn, Ti-Hg, Zr-Zn, Zr-Cd, and Zr-Hg by X-ray Powder Diffraction Methods 219
Adsorption, O on Ta 1038
Age hardening, see Hardening
Aggregates, roasting of 901
Aging Characteristics of Nickel-Chromium Alloys Hardened with Titanium and Aluminum 211
Discussion 1322
Aging, effect after quenching, pearlite-free steels 655
Agitation, fundamentals of 1199
Air cooling, powder metallurgy products for gas-turbine blades 1217
Air preheat, regenerator efficiency, open hearth 129
Alkali contents in steel, as tracers 1391
Alkaline leaching, U ores 1408
Alloys: Ag-Cu-Zn brazing alloys, constitution, properties of 233
additions, effect on S transfer across slag-metal interface 534
aging characteristics of Ni-Cr alloys hardened with Ti, Al 211
applicability of powder metallurgy 1214
Be-Cu, Be-Co-Cu, Be-Zn-Cu alloys 574
behavior, low temperature, Fe 965
calorimetric investigation, Cu-Sn 1257
CaO-FeO-Fe_2O_3 759
Cb-V system 915
commercial Ti-base 581
correction, σ phase 758
creep behavior, Mg-Ce 634
creep-rupture, Al-Mg 973
creep-rupture properties, C, low alloy steels 764
Cu removed, Fe-Cu-C 967
cursory investigation of intermediate phases in systems Ti-Zn, Ti-Hg, Zr-Zn, Zr-Cd, Zr-Hg 219
effect, Al on ferrite 906
effect, C content on structure, properties of sintered WC-Co alloys 285
effect of stress on creep rates of polycrystalline Al alloys 275
electrical resistivity, binary terminal 595
Fe-B, constitution of, low B range 185
Fe-S-O in steel 959
forgeability, Fe-C alloys 835
grain coarsening behavior, Al alloys 603
heat treatment, structure, mechanical properties of Ti-Mn alloys 169
martensitic transformation, Mo-Ti 1280
melting and freezing 527
microstructure, resistivity, Ti-Mn 1089
Mn-Mo σ phase 1406
Mn-rich, ferromagnetism of 983
Ni, substructure, tensile properties 1155
ordering reaction, Cu_3Pd 1076
Pb-Sn, Sb-Cd, viscosity, density 1060
pearlite nucleation, alloy steels 1071
polycrystalline Al, under constant structure, effect of stress on creep rate of 275
preparing homogeneous alloys 772
σ phase in binary alloys 253
systems formed by Cr, Mo, Ni 261
system Ti-Mn-Mo 228
system Zr-O 238
temperature range of martensite formation, Cu-Zn system 303
Ti-Al system, influence of O, N, C 193
Ti-Cr-O system 200
Ti-Mn phases 1247
U-Ti alloy system 207
Alliten, A. G.: *An Fe-Cr-Mo-Ni Sigma Phase* 904
Alumina: lime-alumina-silica slags 1136
strength, alumina-30 pct Cr 1220
Aluminum and aluminum alloys: aging characteristics of Ni-Cr, hardened with Ti, Al 211
Al alloy 75S-T6, effect of repeated tensile prestrain on ductility 57
Al-rich, Al-Cu alloys, solidification 47
annealing, cold-rolled single crystal 257
carburizing tests, low Al steels 767
creep correlations of Al at elevated temperatures 71
creep-rupture, Al-Mg 973
deoxidizer 835
effect, S transfer across slag-metal interface 534
effect, stress, creep rates, polycrystalline Al alloys 275
grain coarsening behavior, Al alloys 603
heat treatment, commercial Ti-base alloys 581
high purity ferrite 906
high temperature strength of wrought Al powder products 247
influence of O, N, C, Ti-Al system 193
load-temperature history of lattice strain, Al alloy 377
mechanism of torsional deformation 305
metallic element in Mn, ferromagnetic phase 983
quaternary system CaO-MgO-Al_2O_3-SiO_2 33
silica-Si relation, slags 1136
sintered Al powder 1214
solid state bonding of, to Ni 269
structure effect, α Ti 1282
tertiary stage of creep 1291
total creep strain in 919
two-stage hardening curve, data 1015
Altered fireclay refractories, inclusions 1391
American, Canadian furnace practices compared 745
American method, desilverizing Pb 842
American Smelting & Refining Co., Cu converting practice 358
Ammonium hydroxide, rare earth separation 1133
